

## RediPulse 6-12

### The Most Effective Pulse/Charging Battery System Ever Created!

The RediPulse 6-12 works with all 6- and 12-volt lead-acid batteries. This system is ideal for virtually any kind of vehicle and equipment that is stored indoors, under cover or in areas without access to sunlight. This includes cars, boats, motorcycles, snowmobiles, farm equipment, emergency vehicles and much more. It includes both lugs and clips with a quick disconnect between the circuit box and the connectors. Comes with lugs that connect directly to the battery terminals.

RediPulse is *The Next Generation In Battery Chargers*. Powered by a specially-designed 110-volt ac adapter, it helps make batteries stronger so they work harder and last longer than you ever thought possible. This system uses our revolutionary *ReNew-IT Pulse Technology™* to safely prevent the main cause of battery problems and failure: sulfation buildup on lead-acid battery plates. Used extensively by the consumers and the U.S. Military worldwide for almost ten years, this technology has been scientifically proven by two major universities to improve battery performance and reduce battery-related downtime and expenses.

#### Benefits

- Prevents dead batteries by keeping batteries in like-new condition all the time
- Helps batteries charge faster and maintain greater reserve capacity so they can provide maximum power to your vehicles and accessories
- Renews dead batteries suffering from sulfation buildup and helps bring them back to life
- Increases battery life span up to three times longer
- Prevents the normal loss of battery power on stored vehicles no matter how long they sit unused -- even months at a time
- Helps protect the environment
- Connects right to your battery and works 24-hours a day when plugged in, plus it will NEVER overcharge your battery
- Works with all conventional flooded lead-acid batteries and sealed “maintenance-free” batteries, including Valve Regulated Lead-Acid (VRLA), Absorbed Glass Mat (AGM) and gel cell.
- Includes an LED light that indicates the circuit is energized and the unit is working.
- Safe, reliable and weatherproof
- Five-year limited warranty

#### RediPulse 6-12 Specifications

Weight	3/8 lb.
Circuit Box Dimensions	3.5" X 2.25" X 1.5"
Wire Length	3 feet
AC Adapter (110V)	110V AC, 60 Hz
AC Adapter (220V)	220V AC, 50 Hz
Adapter Wire Length	25 feet

Also available in a 36-48 model for 36- and 48-volt batteries (735X280)
